

Blank workspace for drawing orthogonal projections of a camera mechanism. The workspace is divided into four quadrants by a vertical and a horizontal line. A central crosshair is present. An isometric 3D view of a camera mechanism is shown in the bottom-right quadrant.

The 3D model shows a grey rectangular base with the following features:

- A grey cylindrical lens or shutter release protruding from the front-left side.
- An orange ring with a grey center on the front face of the base.
- A blue rectangular component on top of the base.
- A green cylindrical component on top of the blue component.
- A pink cylindrical component on the right side of the base.
